LANGUAGES

Spanish (Native)

English (Full profesional)

CERTIFICATES

Test of English for International Communication (TOEIC) - C1

SUMMARY

I am a friendly Software Engineer with experience developing enterprise applications. One of the things I enjoy the most about my work is the possibility to understand other people's problems to then design and develop a solution which allows them to either make their work easier or contributes towards taking important decisions.

While Spanish is my native language I am fluent in English. I consider myself a fast learner with strong troubleshooting and problem solving skills. I work well under pressure and enjoy being part of multidisciplinary teams, also, I take pride, responsibility and commitment to the work I do.

EXPERIENCE

Comscore

August 2023 - Present (3 years)

Software Enginer II (Remote)

- Maintain and enhance business-critical enterprise applications, ensuring stability and long-term reliability.
- Develop and integrate new features to support evolving business requirements.
- Troubleshoot and resolve defects, performance issues, and incidents through root-cause analysis and remediation.
- Migrate legacy C++ codebases to Scala, modernizing core systems while preserving business logic and functionality.
- Leverage AI-assisted tools (mainly Claude) to accelerate legacy code debugging, refactor complex modules, generate unit test coverage, and produce technical documentation improving development velocity and code maintainability.

Main technologies used: C#, .NET Framework, Python, SQL, C++, Scala, AI-assisted development tools.

TECHNICAL SKILLS

- .NET Core.
- .NET Framework
- C#.
- Xamarin Forms.
- APIs.
- Relational and non-relational databases.
- Microsoft Azure.
- Azure DevOps.
- SCRUM Methodology.
- Entity Framework.
- Identity.
- HTML.
- CSS.
- JavaScript.
- CI/CD.
- Python.
- C/C++.
- Docker.

INTERPERSONAL SKILLS

- Fast learner.
- Problem-solving.
- Teamwork.
- Accountability.
- Willingness to learn.
- Adaptability.
- Independence.
- Motivation.
- Time management.

Antara Mining Solutions

September 2022 - July 2023 (11 months)

Software Developer (Remote)

- Developed and maintained a .NET Core-based traceability platform for repairable components.
- Integrated SAP and Ellipse ERP data to ensure end-to-end visibility.
- Built APIs consumed by Xamarin Forms mobile apps and Azure Functions.
- Implemented new features and resolved issues to enhance platform functionality.
- Leveraged Azure resources (Functions, Cosmos DB, SQL DB, App Services, WebJobs) to ensure scalability and reliability.
- Collaborated with cross-functional teams to maintain system stability and performance.

Main technologies used: C#, .NET Core, SQL, Azure.

Nimok

January 2020 - September 2022 (2 years 9 months)

Fullstack Developer (Hybrid)

- Enhanced and integrated features into a .NET Core-based legal services platform, enabling clients to track ongoing cases via web and Xamarin Forms mobile apps (iOS/Android).
- Utilized Azure and AWS resources to expand platform capabilities and improve performance.
- Designed and developed a compliance-focused platform in .NET Core to protect companies from corruption, including blockchain exploration for long-term document integrity.
- Analyzed and optimized an existing compliance program by identifying weaknesses and proposing tech-driven improvements.
- Developed a .NET Core web app for a security mutual company to streamline repetitive document processing.
- Implemented web scraping and scheduled jobs to automate workflows and applied view components to ensure information reuse and consistent UX.

Main technologies used: C#, .NET Core, .NET Framework, SQL, Azure, AWS.

EDUCATION

2017 - 2022

Universidad Técnico Federico Santa Maria

Bachelor of Science in Computer Engineering

2013 - 2016

Universidad Técnico Federico Santa Maria

Technician in Computer Science

REFEREES

Rolando Jofré - rolando.jofre@antaramining.cl

Chief Technology Officer - Antara Mining Solutions

Cristian Carrión - ccarrion@nimok.com

Chief Executive Officer - Nimok
